**Overview**

The Minor in Entrepreneurship is conducted by Nanyang Technopreneurship Center. The Minor programme consists of five modules with a total of 16 Academics Units (AUs) and requires one (1) Academic Year to complete. Most of the modules are conducted during the vacation period.

This programme demonstrates how entrepreneurship is not just about starting a new business – it is about mindset. Students identify when and how to take advantage of opportunities. Students from different schools, disciplines and stages of study will benefit from the exchange of ideas and experiences. We take pride in fostering an interactive learning environment in the form of team-based projects, real life simulations, role playing, case studies and practical experiences. We hope, after completion of the programme, students will be equipped with an enterprising mindset, become venturesome, resilient and able to define things for themselves in this ever changing world.

**Special Features**

- **Build team spirit:** Successful applicants will attend a fully sponsored three-day high impact leadership and team bonding course.
- **Be among the champions:** Work with passionate classmates from different schools/disciplines in NTU.
- **Learn from the experts:** Lessons taught by successful entrepreneurs, business leaders, academics and professionals.

---

**Application Guidelines**

This programme is open to NTU students of all disciplines: Engineering, Science, Mathematics, Humanities, Communications, Arts Design, Accountancy and Business. Students who have passion for entrepreneurship and the desire to make a meaningful difference to humanity are encouraged to apply.

For the programme details, application form and deadline, please visit our website at: [www.ntu.edu.sg/ntc](http://www.ntu.edu.sg/ntc)

**Benefits of the Programme**

What kind of skills and expertise will be in demand when you graduate? While it is difficult to give a general answer of the specific skills required for the different industries, one common skill that is most valued by employers of graduates is innovativeness. Such skills will not only help you in your career advancement, but also help you to start your enterprise when you decide to be your own boss. In fact, leaders of advanced countries over the world are making efforts to encourage entrepreneurship among their young citizens, highlighting the importance of entrepreneurship.

The Minor in Entrepreneurship programme provides the right kind of training to prepare our undergraduates with the essential innovative knowledge and entrepreneurial mindset, reinforcing their core discipline of study and endowing them with the knowledge and spirit for an enriching life.

**Akshay Raman, MiE Batch 37**

Mechanical and Aerospace Engineering

Developing an Enterprising Mindset is one of the most crucial steps not only towards maximizing our contributions towards society, but also towards achieving self - actualization. The Minor in Entrepreneurship Program has provided me with an opportunity to widen my horizon of thinking and creativity and network with some of the best and brightest minds in today's industry. In addition, a channeled course of action towards realizing these ideas is also necessary, which our skilled instructors guide us on implementing.

**Muhammad Hafiz Bin Mohd Jumari, IAE Batch 36**

Sports Science and Management

"ME developed an entrepreneurial mindset giving me a more meaningful life. ME, a life changing experience not to be missed out!"

**Lim Vina, IAE Batch 26**

Nanyang Business School

The MiE programme was transformational learning experience. With a rigorous mix of theory and practical, ME gave me a good start in developing the mindset and skills of an entrepreneur.

Programme Structure

3 Days 2 Nights Leadership & Team Bonding Course
This three-day high impact leadership and team bonding course facilitates students to carry out challenging physical activities they do not normally do. The course is geared towards instilling team spirit and leadership skills in the participants.

ET9131 Entrepreneurship and Marketing for New Ventures (3 AUs)
This module provides students with essential information on the entrepreneurial process. The module includes concepts of entrepreneurship, creativity, innovation, and new venture creation process. Students will learn to generate ideas, identify opportunities and investigate whether an idea can be turned into a viable business through feasibility analysis.

ET9132 Entrepreneurial Accounting and Finance (3 AUs)
In this module, participants will learn, inter alia, how revenue is generated, how to source for funds, how to control cash flow, how to assess the success of the company in monetary terms, and how to assess the value a company for various purposes.

ET9133 Managing Growing Enterprises (3 AUs)
The start-up and growth of an enterprise invariably involves both human and financial capital. To manage the increasing size of human resources and to convince venture capitalists to invest become two main issues for growing ventures. Students are taught to write a convincing business plan to attract venture capital investment.

ET9134 Enterprise Strategies (3 AUs)
This is an immersive experiential learning module. An online business simulator is used as a platform for students to experience the process of managing a business through the virtual media. Students are exposed to some of the major business decisions that entrepreneurs face when growing their ventures and competing with other companies in the same industry.

ET9135 Business Implementation (4 AUs)
This module consists of two parts. In Part A, students are required to create and run a real business of their choice, while in Part B, students are to attend seminars, workshops or conferences to establish network of friends, investors and other entrepreneurs and report on what they learn.

Overseas Exposure
Outstanding students may be selected to attend overseas entrepreneurship-related events and immersion trip.

Entrepreneurship-Related Events
In addition to the formal course works, many events are organized for aspiring entrepreneurs. MIE students are encouraged to attend or to participate in the events.

MIE Speaker Series
The MIE Speaker Series is a platform to engage not only our MIE students, but across all students in NTU, leading them to discover how an entrepreneurial mindset can greatly improve our lifestyle of ourselves and others around them.

ideasinc
It is a 9-month long start-up accelerator programme. Participants with good idea or product may take part in this programme. Mentorship and financial support will be provided to the shortlisted teams to move from ideas to business ventures.

Chua Thian Poh Annual Distinguished Speaker Series
This is a series of seminars for the NTU community and a free public lecture where world-renowned experts are invited to share their experiences and insights about market trends, strategies and the challenges facing global entrepreneurship.

LITE Bites
This is a series of light and digestible lunch-time talks relating to Leadership in Technology Entrepreneurship (LITE), innovation and entrepreneurship in general.

Junior World Entrepreneurship Forum (JWEF)
Held at a national level, this is a platform for youths to discover more about entrepreneurship. It is a forum organised by students to inspire and ignite the vision of entrepreneurship as a means of creating wealth and social justice.

NTU Entrepreneurship & Innovation Festival
This is an annual campus-wide event that features entrepreneurship and innovation activities providing unique experiential learning elements to stimulate and encourage participants to develop an enterprising mindset.
